

GRIP-LOK[®]

Catheter and Line Securement
Safe, Simple, Secure

GRIP-LOK®

Grip-Lok® is a stabilization and securement device that is strong enough to lock catheters, tubes and lines securely in place, yet versatile enough for almost any securement situation. Engineered Stabilization Devices (ESD) are recommended by INS to promote consistent practice, reduce vascular access device (VAD) motion and complications, and reduce interruption of needed infusion therapy.**

** "Infusion Therapy Standards of Practice." Journal of Infusion Nursing 39:IS (2016): S72-74. Web.

- Safe...** Grip-Lok® is packaged sterile, allowing you to use Grip-Lok® *close to the insertion site or right in the sterile field.*
- Simple...** Grip-Lok® is applied in the same simple manner as a bandage and can be easily placed and adjusted.
- Secure...** Durably engineered, Grip-Lok® helps prevent dislodgement and migration of the catheter. This can help reduce lost lines and patient discomfort.
