

MaxiCELL™ Biopsy Needles

MaxiCELL™ Biopsy Needle harvests a greater quantity of cells for cytological evaluation than traditional FNA needles.

Features include:

- ✓ Harvests on both forward and backward thrusts of the needle, achieving a greater quantity of harvested cells
- ✓ 30 degree matched ground needle tip helps collect a cluster of intact cells
- ✓ Each needle has a unique, adjustable needle stop that allows you to restrict forward movement, effectively localizing the needle tip to the biopsy site
- ✓ Each needle has numerically ordered centimetre markings on the outer cannula to provide reference for depth placement
- ✓ Available with an echogenic tip on the outer cannula to promote accurate placement under ultrasound guidance
- ✓ Packed with or without a co-axial introducer needle

Features and benefits

Fine Needle Aspiration (FNA) Biopsy Needles

- Each needle has numerically ordered centimetre markings on the outer cannula to provide reference for depth placement
- Needles feature an adjustable needle stop which allows the user to restrict forward movement, localizing the needle tip to the biopsy site
- Colour coded stylet hubs indicate gauge size of needles
- Available in a variety of gauge sizes and centimetre lengths
- Available with an echogenic tip on the outer cannula to promote accurate placement under ultrasound guidance
- Can be used with echogenic co-axial introducer needles (sold separately)

Needle specifications

Chiba Biopsy Needle

All purpose needle can be used for cytology biopsies and for accessing drainage sites

Spinal Biopsy Needle

All purpose needle, including lumbar puncture biopsy and cyst aspiration

Greene Biopsy Needle

A Chiba introducer combined with a Trocar needle design for coaxial biopsy allowing for multiple passes

Franseen Biopsy Needle

Excellent soft tissue core biopsy needle. Can be used for lung, breast, and abdominal masses. Also called a crown needle. Trocar tip provides excellent laparoscopic entry

Westcott Biopsy Needle

The needle provides the used notch on the cannula, removes the tissue when the needle is thrust forward. Used for breast biopsy and lung biopsy
