

SecurAcath® provides improved catheter securement for the life of the line

- Prevents therapy interruption
- May improve vessel health and preservation
- Lowers total cost of patient care

SecurAcath is the only Subcutaneous Engineered Stabilization Device (ESD) that Meets the 2016 Infusion Therapy Standards of Practice*

The new Standards state:

- ▲ Subcutaneous ESDs have been successful in stabilizing PICCs and CVADs
- ▲ Patient outcomes and patient and inserter satisfaction have been favorable
- The Standards also include a new caution to be aware of the risk of medical adhesive-related skin injury (MARSII) associated with the use of adhesive-based ESDs
- ▲ SecurAcath eliminates MARSII complications of adhesive-based ESDs

Dramatically Reduced Catheter Dislodgement

- SecurAcath clinical data publications show very low catheter dislodgement rates of 0–1.5%¹⁴
- Adhesive securement devices have published dislodgement rates of 14–20%¹⁵
- Many accidental dislodgements occur during dressing changes when catheter is not secured
- Decreased catheter replacement costs
 - ▲ PICC replacement cost is approximately \$500 at bedside, \$1000 in IR¹⁶, \$1200 in pediatrics

FOLD

INSERT

SNAP

Decreased Catheter Movement

- Catheter movement at the insertion site can introduce bacteria beneath the skin¹⁰
- Improved stability may promote healing at insertion site, which acts as a natural barrier to infection
- May reduce phlebitis, thrombosis and infection

Improved Efficiency

- One SecurAcath secures for the life of the line
- Catheter remains secure during dressing changes
- Saves time during routine dressing changes
 - ▲ Dressing change can be done 3–5 minutes faster
- Allows easy catheter repositioning if catheter tip must be pulled back

360-Degree Site Cleaning While Secured

- Excellent cleaning access around the entire insertion site
- Catheter remains stable and secure during cleaning
- Improved stability and cleaning may help reduce infections

No Needle Sticks

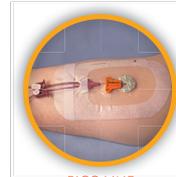

- Eliminates costly suture needlestick risk
- Average cost of needlestick injury is \$825¹¹⁻¹⁴
- There are over 92,000 suture needlestick injuries to healthcare workers in the U.S. each year¹³
